Thread: [Mobile Application Hacking\(Android Only\)](#)

SharkPoison - August 16, 2018, 3:33 pm

I am offering a service now for cracking android apps via reverse engineering, rce, etc.

As a sample of work to show that I know what the fuck i'm doing I will give a quick sample of work.

Some people may have seen a shitty app that tells you that it will pay you to crack an egg(The app was a prank though). It used to be available on the google play store but I think it went down for some reason.

Anyway, the backup is here: apkmonk.com/app/com.aaoz.makemoney/

With the version that I hacked it changes things up a bit. Usually when the app boots up for the first time it sets the amount of times you have to tap it to 350000 which is something I doubt anyone would actually do. Via reverse engineering you can modify the amount of times to tap on startup to only 1.

Link to my version: mega.nz/#!hfwliZzJ!np2hbTG3DCNozStfBDTGSCNGdlQxFlk5CuEySab3mdo
(If your worried about a virus just scan it on virus total)

Scan is here:
[virustotal.com/#/file/8fa670a16a4a55c11fd878c73a9ef99a0bbb25844cac5ed699d11745d7098453/detection](https://www.virustotal.com/#/file/8fa670a16a4a55c11fd878c73a9ef99a0bbb25844cac5ed699d11745d7098453/detection)

I WON'T HACK APPS LIKE FACEBOOK AND INSTAGRAM OR ANY OTHER CRAZY POPULAR APPS. If I could hack those apps I wouldn't sell exploits here!

(Often applications that involve more server side communication are more difficult to crack)

Send me a pm or reply to start discussing
