Before I begin my review, I would like to thank you for giving us ("Appraisers"), the opportunity to review your eBook.

Product: [\[Autobuy\] \\$150 PER day EVERY day, without effort. Crypto Magic €10](#) by "o1nk"
This eBook includes 1 method and 4 pages.

The structure and grammar of the eBook is overall fine and there is not much to complain about with it.

Now for the method itself it is as clearly mentioned within crypto betting. You will be betting with this method and ideally you will earn a decent amount of money doing it. You do not only get the eBook for this method you are also added to a Discord server where you will get any help and information you need. The only gripe I have about this eBook, is that some very useful information relating to the method I only got after I had joined the Discord and was talking to OP about how to execute the method properly. This information that is quite valuable I would like to have added to the eBook so it will help people more right off the bat so they avoid making any mistakes. There was also a small issue with some wording in the eBook, but I believe this has already largely been taken care of.

Now to talk more about the method. Of course, as said, this is gambling and you may or may not lose your entire investment if you have a bad streak/make dumb decisions etc. of course, this method aims to have you be profitable both in the short term as well as long term if you follow the information given to you.

This method is said to have a 91% win rate when applied properly. Personally, I have been using this for a few days, and I have gone both into profit as well as loss. The thing with this method is that you need to check the site you are using every so often to see if it is a good time to bet. If you hit the "jackpot" then you should start using the method for all it's worth for the next 10 or so minutes. This is a very burst like method so to speak, as you will make all of your profit/losses within 15-30 minutes of the day. Most of the time you will not be playing due to the profitability etc etc.

Again, this is gambling and I cannot say that you are guaranteed to make money. Personally, I am still in plus with this, and I have yet to use it at the best time. It is no doubt something that I think can be very profitable if done correctly and strategically.

Also, at the current price point I feel there is no reason not to try this out. You will want to have a \$20 investment or more for this method, but that is still not a lot at all. When it comes to the advertised "\$150 or more in profit a day", that is something I no doubt see as possible, but that will also depend on the site on that day, your luck, and your initial investment, betting amount, etc.

Final Thoughts

To OP I would suggest you add in some more info into the eBook itself so it will be easier for new buyers to not make mistakes etc.

If you are considering buying this then it is not at all a bad product. I have yet to make a lot of \$ with this, but I see the potential is there. I will follow up with more earnings proof moving forward most likely as well. But when it comes to the value here, the pricing of this is just so low that it's hard to not recommend at least giving it a go to see if it is something for you.
