@****.our.world

Hint: glamour

74K followers

83% female, most from US.

Reach: ~400K unique accounts / week

Profile visits: 6K unique accounts / week

Can send screenshots of Insights upon request - can't post pics yet because I'm under 50 posts.

The account hits explore page on every post - a lot of potential to grow & monetize in ever-green niche. Grows about ~100-150/day followers without any work.

Comes with a matching .co domain, a lot of DM groups, and OGE access.

Looking for \$1K USD.

Likes look low because I post 5 times a day - the best strategy for growth with the auto-explore accounts.

Would be getting 5x as much on every single post if I switched to just one post a day.

You're asking 1k for a inactive dead acc? gtfo outa here followers are probably bottled.
You'd be looking at 100\$ and that's if you're lucky.

Can't you read? Likes would be 5x as much if I posted once a day.

Look back at the engagement on my older posts from May-July when I was posting 1x a day.

Looks like you are clueless in growing IG accounts.

Can make \$100 in two weeks from shoutouts alone, LOL.
