Thread: [How do people change their fortnite skins to rare skins?](#)

Nawpaw - August 20, 2018, 1:47 pm

I've seen videos of people changing their fortnite skins to rare skins that they don't have, how do they do it?

I just saw a video on this the other day. The user used HXD to edit the games files. It obviously only shows up for yourself, but not for other players.

In fact its sad but its not true.

Everyone can see it.

But epic recently started to ban people with modified/changed .pak files

Yeah everybody sees it... in the lobby. Like, before pressing "Ready".

It's cool to brag to friends I guess. But that's it.

There hasn't been a ban wave; one prominent leaker has been banned, that's it.
