Thread: [remove .exe icon](#)

narcicist - August 21, 2018, 3:57 pm

Not sure this is the right section but here it goes, so my rat has a custom icon even though I didnt choose one, it simply uses its default custom icon but I want to remove it so the process can mask with other legit processes in task manager, I know you can replace icons with Resource Hacker but I cant seem to remove its icon to the default .exe icon... I tried googling but all the results that come up are how to change icon and not remove. Thanks in advance.

ImSimplyNameless - August 21, 2018, 5:04 pm

So you want a iconless file?

Armada - August 21, 2018, 5:15 pm

Use Reshacker, simple and straight forward.

I did but idk how to remove icon, only how to replace

Mr.Magnificent - August 21, 2018, 11:37 pm

I don't think this is possible, never seen ann application without icon. maybe just make it white to blend in in your task manager?

what I meant is I want my .exe to have the .exe default icon and not the custom icon that my rat puts

What RAT are you using?

PerfectStorm - August 22, 2018, 12:17 am

Yes, use resourcehacker as stated above. Very easy.

05317832892 - August 22, 2018, 6:06 am

Detect it easy can do this. Just delete/malform the icon resource.
