A few years ago I owned a MC server with some other people. It was huge. I decided to open the server up again.

You're all welcome to join. Note that the server is still in 'Alpha', so expect some huge updates!

?????????? ?HcRaid ? ????????????

Raiding is now and we've got plenty to offer you, including custom developed unique plugins that no other servers can comply or stand against!

Not just that but we've got experience and friendly dedicated to help you at every corner!

A short list of what can be found on this server.

- 1) Raiding, PvPing and combat ahoy.
- 2) Golden Apples, Enchanted Armour and tools from breaking farming related blocks.
- 3) Bedrockbases that are not UNRAIDABLE!
- 4) Minigames that custom developed to your skill and liking! (Infection, Funblocks, hide and seek!)

IP: play.hcraid.nl

Damn, I used to love playing on HCRaid. I'm pretty sure avengeuiwill was the one that uploaded videos on there and introduced me to it.

What version server is this btw? I'm hoping 1.13
