Thread: [Gambling Bytes from Slots](#)

RRRaptor - August 22, 2018, 6:58 am

Would be a good idea since I see it at the pokies on a Saturday arvo with the boys slapping fat stacks.

Win something in the slots, have the option to gamble it.

Hearts, Diamonds, Aces, Spades & colour red/black.

Red/black will give the same odds as it's 50/50.

The suits will give a higher chance, and you can keep going until you either want to stop or lose it all.

Video for reference:

FiftyTwo - August 22, 2018, 9:25 am

Seems like an interesting suggestion.

Posting to follow.

Mays - August 22, 2018, 10:21 am

Subscribing to the thread to see if this goes anywhere :)

RAT - August 22, 2018, 11:48 am

I would agree that it's a great idea.

Let's make HackForums a casino of bytes.

RRRaptor - August 22, 2018, 9:34 pm

Appreciate the comments guys. Hope this gets approved.

WageWolf - August 22, 2018, 9:49 pm

Interesting idea, let's see if this gets anywhere? ?

Sigh...

Omniscient - August 23, 2018, 7:35 am

We bought the slots and blackjack scripts then adopted them for HF/MyBB.

<http://slotmachinescript.com/>

The author is good guy and good coder. When he completes this wheel of fortune we'll probably add that too.
