Hey man,

looking for an avatar for my Insta Page. Should be nice and clean

Avatar: Cars or cheetah

You can come up with your own idea too. Just search me on Insta fastonly and surprise me.

Hey,

Really appreciate what you are doing.

I am after a logo for a brand I am creating.

The brand name is Level Up.

It is based around gaming and gaming tournaments for multiple platforms.

Thanks!

I've been looking for someone to help me create a business card for Auto Detailing company, what I'm looking for is a racing car tire that is coming at you like a 30-degree angle and white letters going around the tire that says "Hill's Auto Detailing" in white letters like a racing tire would have, the tire should also be glossy like it was just detailed with tire shine, also there should be a tire tread that is following where it has been running off with a bunch of red smoke behind it as it has just done a burn out. If someone could please help me design it thanks and please have it in a size to make business cards. imgur.com/z9M8qpq

(that imgur link is to what I am somewhat looking for and I'm not that good at making graphics, so take a look and it will help with what I'm looking for, I just need a few additions, please do not use that if you can use photoshop to use real images off the internet)
