Thread: [Most Expensive Ebook on HF?](#)

SIM-1966021 - August 22, 2018, 9:30 pm

Hello, I have just written an ebook. It is so short that it fits on one single page. Heres the thing... it actually works. This method will more than triple your money multiple times (but there is a limit of course- you can even more than triple up to \$1000 per trip (\$3000) but this is only if you get really lucky, more likely you will be able to double or even triple \$300 to \$900 per trip. This is 100% white hat but will only work for a limited time before it becomes obsolete (around the end of September). The requirements are the ability to travel around your city and cash to triple. I guarantee that you will at least double your money, I am selling this only because it will work to an extent until you have depleted all of the resources in your area, then they will not be replenished. Everything around me is almost finished and so I am going to be helping others do it in their areas.

This takes absolutely zero skill and anybody can do it (having a car is definitely very helpful, but not required). If you are unable to double your money's value within 2 hours of buying this ebook I will give you a full refund. In addition to this, there is an added perk which is partially awesome and partially hilarious, but I can't tell you before you purchase the ebook as this would give the method away (some would say it's just as amazing as the method itself). When you purchase this ebook I will personally walk you through the very easy steps to put the method into action right away as well as show you the proof that I am currently doing it myself.

eBook Price: \$300 BTC

Yes, this is expensive, but that is because its one of the few methods that actually work. Only an eBook for an already saturated method would cost \$29.95. I have been on HF since 2013 and this is the first time that I have offered any ebook/method becuase I have never before come across anything like this.

You might wanna add if this method is covered globally or just U.S.A. for example.

This ain't the most expensive one though. I've seen worse prices ;-)

This will work in over 50 countries. The profit margins vary by country. My margins are based on the United States which has some of the worst margins. Most countries are better.

Is there any vouch copy available? Or do you give any? I can make an honest review

Givenchy - August 23, 2018, 4:52 am

Would this work in the EU? For example: Belgium

I was not planning on it. I'm trying to keep it from getting saturated as best I can. If someone really likes it they might even be crazy enough to drive across their whole country doing it- I kind of want to myself but it takes a few days to get your doubled/tripled money back into cash in hand and unfortunately I don't have enough cash right now.

Is this the method where you do city tours for tourists? Because that's how it sounds.

Yes, I have just confirmed that it is working in Belgium

Nope, it only takes one phone call for a few minutes and then a short drive.

It might as well be. But it is completely whitehat and legal and morally okay.

this is so confusing lmao i really wanna know what this is just bc im curious, glws.

IPIKIN - August 28, 2018, 2:19 am

I received a vouch copy but unfortunately this offer is not available in my country. Upon receiving the method and doing a bit of investigation I can confirm that the method would work and as there are over 10,000 locations, there should be a participating store near you.

With this method you will easily double/ triple your investment in a matter of days.

The guide itself is short and simple, straight to the point but it includes all the info you need to succeed.

EDIT: This will work for the most of Europe, Some of Asia, All of the US, most of the Middle East and NZ. Will not work in England or Australia

Not sales trashing, but it sounds like calling the stores to SE gift cards?

Reminds me of the Gamestop Trade-In Promotion Method publicly posted on Twitter, however, I am likely mistaken.
