Its very old crypter and still going on.

Seller did not dropped the project unlike other sellers in long go.

I have to say the author of byte crypter is very helpful the crypter is awesome and absolutely fud but for 4 days the crypter is not working at all. Hope that he will fix this error of this awesome tool.

it is throwing an error <https://1drv.ms/u/s!AtEzLHeMmY1fwlJEBk3NTSs8vIBF>

Author has fixed the error now !! the tool is one of the best crypter's out there!

I've never used it, is it good?

mrknol - March 5, 2019, 5:40 am

I've used the crypter and it wasn't FUD at the time and kept running into issues.
