What's the price looking at? Will those likes be active engagements(assuming the posts are of quality)?

Do you have a pre determined niche that makes your method work or can I tell you the niche I'm interested in?

memes work the best, and the engagements are extremely good if you stick with the niche.

I've had a couple people use meme pages and create meme-type apparel and such on websites to sell. I've never bothered to ask how successful they were, but I know people are doing it.
