I bought this crypter last month, Was using it (Not 100% FUD), and after an update, crypter stop working. He tried to solve my problem, 1 or 2 days, and now he doesnt communicate with me (like 7days ago). Crypter doesnt work bad for that money, but now doesnt work. My opinion:

Support: 5/10 (He tried to solve my problem, and crypted my server while he still working to fix, but didnt fix.)

Product: 5/10 (Not very bad crypter but giving errors)

Quality/price: 7/10 (For that money, not bad crypter)
