Thread: [New purple layout abit bugged](#)

Fiend - August 25, 2018, 6:54 am

I dunno if this has been reported to staff but the new layout overlaps the advertisements at top where navigation is.

Hope staff get's this resolved

Loving the color scheme. ;3

You don't have this issue because you have an upgraded account and don't have to see ads at the top of every page.

I have this issue as well, hopefully it's fixed soon.

Yup, your right. Just tried by logging out. The banner is indeed being overlapped by the menu buttons.

The theme is broken when you are viewing alerts and click view alerts. It shows another menu, then it shows the alerts at the bottom.
