Spoiler ([Click to View](#))

Not really looking to disclose how it's done. Not any time soon though. So don't ask me how ?

RS3 is full with duped items.. still nice though :)

Nyx - August 26, 2018, 12:02 pm

Upper revision RS is always easier to abuse on due to how much more content they have added.

Good find!

Are the items the same item id as the actual item or are they not usable outside of wherever you smuggled from?

This is really awesome to see OP, been awhile since I've seen something like this

Are you able to transfer them? I have an old account somewhere with a bunch of smuggle Dung items.

Cheggster - August 28, 2018, 5:23 am

Sucks that you're playing the World of Warcraft version of RuneScape, nice smuggles though, you got any castle wars items?

mehwter - August 28, 2018, 7:25 am

By smuggle do you mean bringing items places you usually can't?

I really love runescape but idk RS3 breaks my brain i can never tell what's going on

Edit: see what I mean? I just realized that you're standing in Lumby lmao. I get what smuggling is now.

I think they are the same item. They look like they came from a player owned house so they should all be usable. Might be very noticeable walking around with big red or blue hands though lolol
