The method itself isn't hard to grasp at all, however the program makes this 99% auto-pilot unless your lazy ass cant type 3 numbers once a day.

xjamer is extremely generous with his time also, no hesitation to ring me and explain anything I needed, but to be honest support isn't really all that needed other than software related issues, he's made it that easy.

I'm currently only investing 50\$ to saturate my PayPal with transactions before I hit the 250\$ or my goal 500\$ per try. I will post updates as I go a long however even without trying the method you'd see how reliable it is and I have no doubt I will get my money back + profit for the rest of my time with the program.

Don't hold out, this isn't bullshit.

Its designed for lazy people, it isn't an ebook you have to read or deep knowledge you have to understand. You literally can start making money and easily make your investment back the first week (even more than that).

But to be honest, the support he provides is outstanding, he will 1:1 you all the way and set you up completely.

He even wen't forward and sent the first investment from his funds on my behalf so I know how it works, he is confident that I will be able to pay back simply because it works. If that wasn't enough, he hinted me a second method to start making money based on my location.

I can say I took my chance with this, and glad I did.

I can definitely vouch for this and recommend this to other users.

10/10 vouch for this completely. I got paid out everything went smooth.. Program is just completely super simple and there is no telling how much you can make with this over time. Like other posts have said you'll need to build up to bigger amounts but other then that this is fool proof.

If you have the money to purchase this and want extra cash every week I would defiantly go with this!

It's not some ebook or "private method" either.. it's literally downloading the program and entering some numbers that takes 3 minutes of your time to enter a few numbers and boom wait a day and you can your 20%

After getting the bot setup and putting in my first transaction for 100\$ I was pleased to my receive my 100\$ back plus 20% on top of it, all within about 24 hours. I am very pleased to have purchased xjammers program and will be very soon making thousands.

The initial investment is in what form ? Credit card via your bot ? Bank wire ? BTC ? Kinda confused as how it really works.

TheForgotten - August 29, 2018, 6:27 am

Also if this is really gaining 20% a day, OP should have made way more than just 9.9k in 6 months lol This is anything like 1.7k/month which is about 50-60\$ a day. Taking on mind he started with \$200 only his first day profit is 40\$. The moment he scale it to \$1000 he would start earning 200\$ + everyday. So in my opinion this does not work as it should. You are not wrong a few reasons why I don't make that much, the reason is I haven't got myself to do many big transactions or multiple as I have told my friends about it, and they do transactions valuing from 50 - 1k. Also, it takes 1 - 3 days for payout as well. So if I did too many values others wouldn't be able to cash out fast enough, and it wouldn't work as well

No paxful at all.

Yes I would say its greyhat to be truthful, the reason being receiving paypal funds for btc is technically against pp tos, to bypass this you receive transactions that say banner logo design or some other type of service. Such as a fake tracking number and so on

When u first start you put in 25 usd then 50 then 75 and so on. The max I like to do is 500 USD at once, however, I know people doing 1k at once and more recently 3.4k but they grew it till that amount.

<https://i.imgur.com/nbhGo4B.png> More money came today you guys could be making this much not hard at all and I am the only seller that posts proof daily that the method works. Even more going to come today

So you said there was no risk but why do you sound like its a risky thing to do? Also say I invested \$500 how long does it take to get my 20% ontop? Also once \$600 has come back can I invest \$500 again straight away and get \$600 back in roughly the same amount of time as the first time I done it?

The only risk is the PayPal thing, which is why I recommend a stealth PayPal even though I do all transactions to my main. Yes, you can reinvest straight away and yes it will be roughly the same time to receive again. The only hurdle really is PayPal allowing you to take multiple transactions to do this I just call them and say I started a new shop etc. and I am expecting a lot of transactions coming soon. Ever since then I have used my main with no issue.

Also I am hoping more people leave reviews as well soon so you can see this really works :)

when you start getting too many payments on your PayPal, you will be asked to take a picture of your driver license or your passport, that way, PayPal wont stop you from anything

Basically, a stealth account is a fully verified paypal not necessarily under your name. The way to make it strong is you keep using it daily, and you do say small amounts then slowly increase it once paypal sees your doing this on a normal basis, they won't hold or stop the transfers to bank, therefore, making everything work seamlessly.

Just to show you how much you can do with a really strong stealth account

716 USD was profit on this absolutely insane.

He also grew his paypal account but now he makes roughly 1k a week and pays his car and monthly rent as well as has extra money on the side.

I am not saying you will become like him but its possible and takes time within 1 month he was able to make his paypal this strong.

I have been using this method for a while, this is my 4th transaction and so far everything is working. I am doing low amounts to grow my PayPal. This method is very HQ unlike most of HF methods and xjamer also provides excellent support. Can highly recommend buying this

It's not a scam, the issue is most of the reviews are from people who aren't HF users as most of my buyers are people I know in real life and from other discord groups. However, I sold it to fear hopefully he can write something detailed. Also, I tried contacting Theo about this too but didn't get a response. Lets wait for the reviews. Honest review:

I got this program for the 20% per one. I will say 100% this works.

Just beware the risks, I'm going to be honest sorry OP

THIS IS TRADING CRYPTO FOR PAYPAL WHICH IS AGAINST PAYPAL TOS STATED HERE:

<https://www.paypal.com/us/webapps/mpp/ua/acceptableuse-full#prohibited-activities>

Section 3 (h) "involve currency exchanges or check cashing businesses"

All the transactions are from NON-US paypal accounts but majority (I've gotten about 15 different payments) are verified, only one wasn't so far.

Now, I can't blame OP or the other seller of this for not warning me, but quickly after starting this method w/ similar earnings that my paypal was doing from other operations I once did I got permanently limited 5 year paypal account gone like that...

I called and they closed my account because of suspicious payments of which they threw a range of guesses of what type of payments I was getting

as well as stating I had another paypal account opened that I never used that I made before this account of 5 years that they decided to also say was a violation.

This can and will make you money, just stay safe fellas

and yes even tho the risks I will continue this method one way or another... much more slowly.

Thanks for your honest review. Part of the reason I state to do small amounts also I want to state this user did not buy the method from me but yet another person who didn't state the risks and exactly how to go with the method. However, I think you can agree that I did work with you and I am still currently working with you to get your funds back. Also, it's my understanding you are still doing the method. Reason for the ban is a sudden increase in transactions. Also if you ask any buyer I tell them all to do small amounts and you did \$980.69 in less then a week and just starting off. This is going to trigger Paypal right away as your account must have received over 100+ transactions. As I stated, you did not buy method from me and I didn't profit either from you buying it, ask the guy you bought it from. Also, I have already stated in the thread that we are trading crypto for PP which is what makes it greyhat, however, PayPal never finds out that you are doing that via my method. You got banned due to the number of transactions which were all of a sudden and suspicious. None of the transactions themselves caused the ban but the sudden increase in transaction, this is not because of the method except the necessary precaution was not taken.

Also it's my understanding you are still doing method as you did receive profit from this.

Twas about 20 transactions from the \$1000 total, and \$1000 in a week in the month of August for my paypal is not abnormal as my sales always went up to near that around august - december.

Might I say also out of the \$1000, I got about \$800, which is very normal for my paypal

The main problem was going from 40% of my payments being NON US to 100% so quickly. Play it safe and even if you get 10k/m in your damn pp start with way less than that. Build it up as if you were getting a customer base that was non-us. Ya cant just have all the pasta loving italians buying shit from ur paypal all at once ya digg.

I will continue doing this with new ways

I'm a casual dumbass, shit happens, not OPs fault, hell its OPs program but he wasnt the one who sold it to me, so I can't blame him, the other seller gave no detail nor warning of this mostly just stated match what your paypal does and "I should be safe since my account is old enough"

This program will make you money, just don't be a bignose like me.

In all paypal really stressed the point that I had 2 paypals even though one was untouched for 6 years no payments or anything. But they also stressed the suspicion of the new payments being all NON-US. Take it as is paypal managers telling me straight up what their systems are looking for.

So try and match your history dont have 80% of your transactions be US based and 20% non us to all of a sudden 50% US based to 50% non us based

xjamer has been nothing but helpful to me since I got into contact with him realizing he was the owner of the program and not the user who sold it to me. The other user was somewhat helpful but really didn't emphasize any precaution and just said fuck it after he got his money. Thank you xjamer for your help and I can't wait to start making bands off this

It cannot. But because of the nature of the program, too many people can make payments take longer. That's why after I take in a few more people I will close the thread and just sell the 10% which is very easy and isn't as affected.

Disputes don't really occur as it's very very rare. Happened to me once after 6k in transactions and that for only 30 usd. But basically, if this happened you would let that person win and then the bot will reimburse you with the amount that was disputed. Let me know if you have any other questions

<https://hackforums.net/showthread.php?tid=5880341>

I legit replied on the thread but I will post it here as well.

Let me clear this up. The program is 100% mine, Phil did show me the method a long time ago. However, my method and approach are very much different in terms of safety, I also provide how to buy btc for 0 - 3% as well as the program and the 20% which Phil does not provide. I, however, let Phil sell my program once only, which he did to Carbo. In terms of proxy selling, we are not doing that. I and Phil do not share any profit. Anything he sells he keeps anything I sell I keep. Ask Carbo as he is the only customer to talk to me and Phil. Also, I don't sell my method for 500 like Phil I sell it for 300 which is better and not too much of an ask as well as provide 100% support, and the 20% which Phil does not provide.

Different

- Providing Program(Automation)
- 20% & 15% rate (Phil and anyone thinking of selling the method will never be able to provide this)
- Buying Btc for 0 - 3%
- Support in my discord

Let me be clear me and Phil are 2 different entities we do not share any revenue or are doing any proxy selling.

Ok, so if anyone seen my post a couple of days ago I purchased this super skeptical and not trusting this at all.

Immediately after buying I added OP on Skype and chatted with him for about 25 minutes with him showing me how it works and why it's worth the price ect ect..

10/10 vouch for this completely. I got paid out everything went smooth.. Program is just completely super simple and there is no telling how much you can make with this over time. Like other posts have said you'll need to build up to bigger amounts but other then that this is fool proof.

If you have the money to purchase this and want extra cash every week I would defiantly go with this!

Honestly you'd have to be out of your mind to believe a program could make you money back plus 20%, but I'd be lying if I said it doesn't work. The method itself isn't hard to grasp at all, however the program makes this 99% auto-pilot unless your lazy ass cant type 3 numbers once a day.

xjamer is extremely generous with his time also, no hesitation to ring me and explain anything I needed, but to be honest support isn't really all that needed other than software related issues, he's made it that easy.

I'm currently only investing 50\$ to saturate my PayPal with transactions before I hit the 250\$ or my goal 500\$ per try. I will post updates as I go a long however even without trying the method you'd see how reliable it is and I have no doubt I will get my money back + profit for the rest of my time with the program.

Don't hold out, this isn't bullshit.

Only method that can get you easiest \$\$\$ on the forum. And I have bought many.

Its designed for lazy people, it isn't an ebook you have to read or deep knowledge you have to understand. You literally can start making money and easily make your investment back the first week (even more than that).

But to be honest, the support he provides is outstanding, he will 1:1 you all the way and set you up completely.

He even wen't forward and sent the first investment from his funds on my behalf so I know how it works, he is confident that I will be able to pay back simply because it works. If that wasn't enough, he hinted me a second method to start making money based on my location.

I can say I took my chance with this, and glad I did.

I am honestly shocked this method requires no fucking energy or time its one of those extremely rare methods where it does what it says unlike 99.9% of other HF method. I am in xjammers discord group and I can honestly say this is by far the most braindead and simple method. Not only that xjamer support is the best fucking support on all of HF he is with you 24/7 and even accommodates to everyone's needs. The first program was written for Windows only but I had a mac and didn't want to use a VPS so xjamer 5 days later integrates the bot with discord and now it works on every single device. I got to say I am speechless truly and so happy I was able to get in. ?
