Thread: [\[SOURCE, 1 COPY\] Fortnite Cracker | Custom design | Many functions](#)

Prox - August 26, 2018, 12:28 pm

Selling the source of my Fortnite cracker named "Epic Games Recovery" to ONE person.

Moving on to another project and don't feel like bumping the threads, haven't marketed it at all personally, previous sales thread was empty but has had sales. Received \$150 in sales in the first few days it was released on my partner's thread who is now banned.

<https://hackforums.net/showthread.php?tid=5831586> <- Includes vouches and a review.

It is made in VB.NET 4.0, and custom designed in GDI. Very stable. Lots of potential to make money for anyone wanting to sell a cracker!

One copy

Price: \$225

Functions:Proxyless + Ability to add proxy list

Username Scraper (Scrapes directly from Epic Games forums with a private API)

Combolist creator to use with scraped/non-scraped usernames

Custom thread limits

Custom proxy rotation limits

HWID support

Thread Design

Add skinchecker and this would get sold.

I might be interested.

I'll let you know.
