Thread: [Anima: 12 Controls](#)

Naywyn - August 28, 2018, 2:31 am

Hey, I thought I'd share that theme I made 1 year ago called Anima. It's an experimental theme so things might be broken.

The theme is animated and includes controls such as the ListView and custom made ControlBox. Keep in mind there are no scrollbars so make sure items don't go out of bounds.

Here is a streamable link so you can see the sexy animations: <https://streamable.com/d8fgn>
Download: <https://pastebin.com/5A4zQkEU>

Hope you enjoy this one as much as I did while making it.

Vyxn - August 28, 2018, 8:32 am

Seen all your works. They're all great.
Thank you for this wonderful contribution.

Naywyn - August 28, 2018, 10:59 am

I'm happy to hear you like it.

aneeshkollam5 - August 29, 2018, 1:09 am

Thank you for this stunning theme,
like all your theme

UniveX - August 30, 2018, 5:10 am

As always, lovely theme, thanks for it! :)

In case anyone is looking for a C# version: <https://pastebin.com/zv1Ufc6g>

Seems to be working fine, atleast from what I've tested for my needs.

VmX5 - September 3, 2018, 8:21 pm

Nice to see you're still making themes, this one is really nice.

p9ck4d - September 7, 2018, 4:15 pm

Thanks sir, I've been looking for a decent theme for my apps!

I'd +rep you if I could!

My Computer - September 8, 2018, 7:15 am

Really nice theme! Thanks for sharing.

SaketSaket - September 8, 2018, 2:35 pm

Awesome work as always... keep rocking...

EdwardSn0wdent - September 8, 2018, 4:37 pm

So you wrote every line of this? Considering it is nothing but garbage that's been released constantly with a few colors changes. Yes programmers like me, real Ones can spot instantly ball shit coding that is nothing more than multiple copies and pasted methods. If you are going to copy code at least copy decent code.

So funny members saying this is good when it's fucking garbage.

You want to say yes I will rip you apart with each line that shows you have no idea what most line's even mean. Stop thinking copying other shit code is programming you an absolute joke.

I am ident, Sn0wX, Alpha and Omega.

Please add a scroll to the listview..

I'm trying to make a crypter and I can't without the listview having a scrollbar, all the other themes suck hard..

Nawyn Ik u could do it..

If you can code a crypter, surely you can add a simple scrollbar to a control, right?

Vyxn - September 15, 2018, 7:29 pm

I don't think he's selling one.

JustNothing - September 16, 2018, 11:09 am

Thanks for the awesome theme. I'm using it for AspireCrypt now!

Keep the good work up ?

...

I use C++/C, Im pretty suckish at winforms with c#, they removed c++ winform back in 2002

I might switch to wxWidgets (used it once) but its harder to make a theme for it..

Back in 1998/1997 C++ winforms had a designer and i was in college by then, but back then, windows had stuff most people here wouldnt know, it was crazy, i tried getting the framework/driver required for vs 9.0, but it needs 32bit too and the thing is missing for download..so i wouldnt ask if i could use vs 9.0

th3s3cr3t0n3 - September 18, 2018, 2:06 pm

Yeah I like this. You should carry on with it, add more controls.

Spade - September 20, 2018, 2:06 am

I have bunifu installed
<https://gyazo.com/b901ccc17ca24754600e998766330b3b>
could that be a factor?

developmentDesigns - September 26, 2018, 4:22 am

Hi there i was wondering if you can give a example of the usage of the listview
as i get this error "Value cannot be null. Parameter name: source"

Vyxn - September 27, 2018, 9:05 pm

Count is not a member of System.Array. No method Count was found on System.Array

Value cannot be null. You're passing a null value which is not allowed.

LeonieHackPetaBytes2 - January 12, 2019, 10:49 pm

looks nice but i get like 7x Count is not a member .. i wonder why some themes work and some dont..

Nopal ZXS - July 12, 2019, 10:28 pm

Looks good!

Nice release.

! || CallMeWolf? || ! - January 30, 2020, 9:20 pm

any tutorial on how to install this theme in visual studio i am new to it !!

Create a new class and paste the theme code into it, save and run your application. You should now have the anima controls under the "[Project Name] Components" section of the toolbox.

Sure thing, I haven't got round to using the theme just yet but should be soon. Will let you know shouldn't be too difficult.

UniveX - February 5, 2020, 4:21 am

(Feb 4, 2020 06:18 PM)Porn Wrote: [\[CITE\]](#) let me know if you can get the listview task working for the c# version

Simple to do;

You just have to approach it a bit differently than normal listview in winforms, but it works fine.

You need to define columns as a string array and items are normally a listviewitem array, example code below:

```

Code private void Form1_Load(object sender, EventArgs e)
{
    //"list" is my name for animaexperimentallistview, replace with yours.
    string[] columns = new string[] { "Name", "Age", "IQ", "Country" }; //create array of your
headers / columns
    list.Columns = columns; //attach it to the listview

    //now for the items, its simple aswell
    ListViewItem i = new ListViewItem("John"); //first column of the row
    i.SubItems.Add("25"); //2
    i.SubItems.Add("3"); //3
    i.SubItems.Add("Uganda"); //4
    list.Add(i);
    //now if the add another user row
    ListViewItem x = new ListViewItem("Rocket"); //first column of the row
    x.SubItems.Add("45"); //2
    x.SubItems.Add("12"); //3
    x.SubItems.Add("Sweden"); //4
    list.Add(x); //you have second item and so on
    //it's almost same as normal listview, you just have to access it differently.
}

```

This will result in this: (don't take the info seriously, just random nums and info to show it off).

Hope it helped, have a nice day,
UniveX

AnonMouse - February 6, 2020, 6:23 am

wow thank you this really helped me

savaganka - June 7, 2020, 12:33 am

hello

I need this c # code

deleted on pastebin site

thanks
