Thread: [Alts using my Referral](#)

Techius - August 28, 2018, 2:57 am

I've never referred anyone to this site. Yet, on the same day I've had 3 accounts sign up using my name as a referral. I'm very suspicious of this. I think the best thing to happen in regards to this would be to get them banned. I can't do a trust scan. It still doesn't seem right.

I was checking out the slots. Then I wondered why I had 300 bytes suddenly. That's how I found out about this.

I feel like this is either an attempt for someone to do shit and then frame it as me or they're just going to sales trash and troll on my threads.

It's just a happy coincidence that 3 new accounts were registered under my referral (which I've never given out) and are now commenting on my stuff. I'm being wary.

Just checked their trustscans.

One of them has 12 matching IP-addresses. So probably someone who's trying to be funny I guess.
