That's another thing to know too, threads are not able to be deleted and you are not allowed to edit your posts to destroy the content of a thread. Staff generally only delete threads if it comes with a ban to the user who posted them.

You are allowed to edit to update your post with relevant info or fix mistakes, etc, just don't remove everything and say "removed this post" or something like that. There are some time restrictions that prevent you from changing posts after a certain amount of time has passed (48 hours for regular members I think?, upgraded members don't have this restriction).
