Thread: [\[Community Alert\] Trz-RAT is a copy-pasted Quasar RAT](#)

Vyxn - August 29, 2018, 7:39 pm

Special thanks [????](#)

You heard it right my friend,
User, [Trzanium Production](#) is selling a copy-pasted product here:

[2018] [Trz-Rat | Remote Administration | Clean | Stable | Easy To Control *Save 40%*](#)

The source used is from an open-source project, Quasar.
I have given the user a chance to admit but he says no:

Shame.

Now with the help of one user here, I get the access to the files and started to read its code.
And yeah, it didn't surprise me.

Source code from Quasar:

Source code from the Trz-RAT

The difference of structure was due to the decompiling process. Still, the names and what not are the same.

Disclaimer: No license sharing happen between me and the user who bought this product.

No cracking happen, all the code and license system are intact in the files.

Bott - August 29, 2018, 7:45 pm

should remove the user who helped u as he just leaked his tool to u so in theory he would be banned for doing so.

No leaking happen as the file has still a licensed system intact.

I know already that I'm a garbage. :(

CyberError - August 29, 2018, 7:55 pm

Nice catch , do staff takes some actions against him ?

#Skyline - August 29, 2018, 7:55 pm

I think bandors did something similiar in the past and rethemed Quasar.
This is all a repeat hahahaha. He won't make sales.

I don't think so. Just making this thread so his future customer knows.

I'll keep catching them. I think this was my 3rd catch here or 4. I don't know.

Ardamax - August 29, 2018, 8:46 pm

he must return pay for the stupid thing

James Burnham - August 29, 2018, 8:56 pm

Wasn't there another rat a few months ago that was just a retheme as well? I don't remember its
name, but I think its owner(?) got banned.

Nope, a user that bought this gave me the files. No license was shared.

BTW I didn't buy it, I got a vouch copy. As soon as I opened it many aspects instantly reminded me of Quasar.

I've lost count how many Quasar's rip-offs I have seen being sold here. There have been at least 5 different ones in the time i've been here.

Wasn't Akara RAT also another Quasar retheme?

and Minotaur RAT, the one Bandors ran I guess.

NYANxCAT - August 30, 2018, 10:19 am

"BUSTED"

Well done bro!

I hope admins will do some action soon.

int - August 30, 2018, 10:24 am

lmao.

I remember posting in one of the pages in the beginning of their sales thread asking what made this RAT different from others, and they didn't give a good response

waiting to see how long till this paster gets closed

Yup, I confronted him on Skype he had no clue how to respond.
He claims it isn't a copy but he is ignoring me now.

Nice work Vyxn, way to go.

[\$(5)\$] - August 31, 2018, 10:30 am

What the hell is wrong with people lol do they really feel they'll get away with this? A large amount of people on HF are indeed very good at investigating EXACTLY this scenario.

Way to go OP.

Dotexe - August 31, 2018, 10:35 am

Lmfao that's so pathetic, i wouldn't even buy this crap, look at this ugly GUI, good catch my man

Thanks and indeed, UI was so horrible.
Seems like the dev is a 3 years old. A tool for administrating machine should be coded professionally.

Judging a program's quality / worth by the design of its interface is childish. Many of the tools sold on this forum have fancy GUI, yet they lack in quality on the technical side.

Anyway, I'm not defending Trzanium (stupid name, eh?), selling re-themed FOSS should not be endorsed.

yes

its pretty laughable that kids think they gonna gets some premium tool here like anyone here has an actual coding skills. they just go on github and find a script. find a buddy. changes few lines. sells as BRAND new tool.
