Haha I thought the same, is it not possible to make it free using such forum software? Or perhaps a security protocol :O

tbh our forumsoftware does trigger errors when you create a free paid sub, that situation brought me to the idea to grab the paypal addresses of every free weekend user incase of leaking attempts, so i did not work on finding a solution and thought it would be the best idea to make it 0.01€.

but i changed my mind since first: who would be so dumb and use his main p2c paypal to purchase and second: the last time we got leaked in january it just increased our sales while still not hurting our customers safety in any way so i couldnt care less.

we found a solution and it will be free now tho :)

legitsenseuser - September 1, 2018, 12:15 am

we did not think that so much people would be interested in this free weekend so at the beginning we had server and technical cheat issues, but we hotfixed them all and after about 1 hour everything went straight forward and perfectly smooth.

so come join us guys! the weekend is long and its time to have some fun, we've also just implemented closest bone into our aimbot, a feature which was requested a lot by our members.

also in leaguesense there will be a huge surprise update never seen before and if you are registered while our free weekend is active you can see it before everyone else.

Tron_89 - September 1, 2018, 10:26 am

You really didn't think this through lmao

legitsenseuser - September 2, 2018, 1:18 pm

thanks for everyone contributing to the free weekend, it was a huge success. i hope you enjoyed it and had some fun and maybe we will see us soon back on legitsense.cc
