Thread: [Events triggered by players only?](#)

Lind33 - August 30, 2018, 7:14 am

I know how it sounds and looks, another popbob wannabe. However, i'm still curious about this. I couldn't find any strict list of events that get triggered only if a player is there (Like thunder for example). So i decided to come here. Any ideas guys?

foddermc - August 31, 2018, 2:41 am

okay so ill just give you a quick rundown of the possible ones that 2b has disabled.

/tell exploit (Pretty old)

lightning exploit (very old)

wither spawn sound exploit (semi old)

Im pretty sure there's another one going around but you'd have to check.

i heard some loud as stompin' people 4000 blocks away from me in minecraft when i turned my headphone volume up to 89%

this may help you

I also heard this.

Hope this helps ?

Hilarious.

What i actually meant is an event tracker for foot-step sound event.
