^ This thread is where i usually sell rsps hijacking services and it goes quite well, but i'm feeling extra friendly recently & have been providing services for free.

If you get a small list of UNIQUE usernames & send them to my discord @ Wiz#3265 alongside the name of the server to hack, we will try a few accounts until i find you one successful hijack.

all i ask from the service is a Positive REP for the kind service! Thanks guys :D

You can't post your discord publicly.
