Who even uses DarkComet anymore? Google Galileo RCS. Its cracked version is available on the clearnet. Go for it.

Stay away well away from DarkComet, vulnerable .. old and who knows anymore where clean copies are.

What is this, 2014? There's tons of threads about free tools but you choose the one that's been proven most exploitable and unreliable.

Do you know a place to download RCS Galileo 9.6 files?! All the links that I found are expired.
