Thread: [Anti-AFK plugin](#)

Robert Downey Junior - September 3, 2018, 9:23 am

Is there something like an anti-AFK plugin for firefox, but, listen, like I just need it to work on a specific tab without interfering with my work, if that makes sense. To work only on a tab, meanwhile I'm using firefox for anything else.

I got a way around your problem which i came up with right now. Download virtualbox (this is like another computer in your computer). then in virtual box DL firefox. After that DL mouse recorder pro or an auto clicker. AFK PROBLEM SOLVED :D!
AND! you can still use your computer hehe.

I know what virtualization is, but god damn you're sooooooooooooo right!!! This would work!!
If I could +rep you, I would. Thank you!

Puns LOL

animalchub - September 26, 2018, 7:15 am

I mean a more simple route would be to just install Google Chrome then get this add-on.

<https://chrome.google.com/webstore/detail/staying-alive-for-google/lhobbakbeomfcgjallalccfhfcgleinm?hl=en-US>

I mean if you can dl a vb at work you could for sure dl chrome.
