I am really confused. I pay \$9 for \$1 off/gallon, I get 14 gallons at most. I pay \$9 for a chance at it not working and risk of getting in trouble and best case I save \$5.

Please clarify if this is correct math.

20 gallon limit bring a 5 gallon container if you not driving a truck or suv

codes there now have \$1.25 and one has \$1.15 so $\$1.25 \times 20 = \$25$ cost \$9 net savings \$16 bucks
