You can now use your Bytes to play Blackjack on HF.

Enjoy everyone. Have fun!

Money- - September 3, 2018, 8:20 pm

First post. Can't wait to try it out. Thank you admin!

Punisher - September 3, 2018, 8:20 pm

It's here! It's finally here!!!

Time to blow some bytes ;)

Thanks for the new feature!

B0Trun - September 3, 2018, 8:22 pm

Thanks alot Omni , if you bring Poker to it as added list , will get more traffic on getting BYTE famous more.

VmX5 - September 3, 2018, 8:22 pm

This is cool! BTW When you're out of bytes and you click purchase more it takes you to hackforums.net/purchase_credits

Kill Joy - September 3, 2018, 8:24 pm

Glad to see this added now. :)

Juicy - September 3, 2018, 8:26 pm

Yooooo I've been waiting on this, thanks omni

Evanescence - September 3, 2018, 8:27 pm

Nice addon. Waiting for something more as I'm not aware of this game.

gstar - September 3, 2018, 8:28 pm

Nice, good addition HF team.

phunted - September 3, 2018, 8:31 pm

I have already lost all my bytes. I must not be very good!

Biggy - September 3, 2018, 8:31 pm

That's awesome. Great work Omni & Xerotic.

TB12 - September 3, 2018, 8:34 pm

My favorite betting game! Not sure if this is good or bad ?

Lavish Living - September 3, 2018, 8:42 pm

Greets another way for me to lose all my bytes. Thanks

Cameron - September 3, 2018, 8:48 pm

Was never big on the slots but always loved me some blackjack. Damn this is making me want to get another GA for them sweet and juicy 50k bytes.

Good stuff guys.

Two-Ton 21 - September 3, 2018, 8:48 pm

If you bust with > 21, the dealer will keep going, past 21 in one case. Not sure if it's meant to work this way or an error.

SIM-3558566 - September 3, 2018, 8:48 pm

Damn, I love blackjack! Great add

EDIT: already out of bytes.

Minnesota Nice - September 3, 2018, 8:58 pm

Hey that was a good idea ;)

Glad that this is now a feature hahaha

ThomasGB - September 3, 2018, 9:00 pm

I hate this Daniel Magliola ! for this games, great implementation , but I'm going to looose again

lurking - September 3, 2018, 9:00 pm

I've never played at a casino where dealer gets house advantage on a dealer BJ and player 21 hand, usually a push but Omni lives in Vegas where all the rules I know go out the window at some

casinos lol.

Omniscient - September 3, 2018, 9:24 pm

Quote: Was never big on the slots but always loved me some blackjack. Damn this is making me want to get another GA for them sweet and juicy 50k bytes.

Better hurry then because I'm removing the bonus bytes tomorrow. It was just for labor day weekend.

Dealers win with a natural blackjack. The error is that it allows you to still play.

There could be bugs with the game. Just report them and we'll either try to fix them or contact the developer.

Minnesota Nice - September 3, 2018, 9:27 pm

Oh, wait, didn't realize that the player was working with a 3 card hand. If dealer has a 10 value card or an ace face up they should offer insurance, if its a blackjack and you have a blackjack naturally its a push. So that would be an error in the way the game is coded.

?lack Hat™ - September 3, 2018, 9:30 pm

I love this, hopefully a full blown casino in the future.

SIM-2306826 - September 3, 2018, 9:43 pm

Eagle 95 - September 3, 2018, 11:14 pm

Damn you Omni, I love Blackjack. There goes my bytes. Site is slowly turning into Las Vegas. ?

edit: THIS IS CROOKED!!!

I knew the moment I saw that Ace he'll have a blackjack. :(

Nico - September 3, 2018, 11:44 pm

Alright here's my fucking money start selling bytes! I've been waiting for this and I'm not excited to lose them all here soon.

Really enjoying how fast the site is being innovated. I believe HF needed all this change.

I can't say for sure if dealer has a natural blackjack and the player does how the script will react. Maybe someone can play enough for that to happen.

Originalkillit - September 4, 2018, 9:22 am

All lost in slot and now this

Nothing else left to loose and never gonna win
because...

Minnesota Nice - September 4, 2018, 10:40 am

Ok in this scenario I shouldn't have been able to play, if the dealer is dealt a natural BJ it should offer insurance and then if its a BJ it flips right away.

Omniscient - September 4, 2018, 10:43 am

Quote:When I tested it on KnotBB you get refunded the money but there is no insurance option.

There is a surrender which technically is the same thing when it comes to the money. Let's say you have \$10 bet. If you choose insurance it will cost you \$5. If you win you technically only win \$5. If you lose in the draw then you're out the \$10 + \$5 insurance you paid because you only get paid on insurance if dealer has blackjack. But with surrender you can do it on any hand including when dealer shows Ace. In such a case you get 1/2 your bet back and close the hand. So a \$10 loss now becomes only a \$5 loss. This is why surrender is better than insurance.

Quote:I love this, hopefully a full blown casino in the future.

We have a lottery, slots, and blackjack. That's pretty reasonable.

Btw, we have max bet 100 Bytes but we thought about raising it to 500. Is that reasonable or you guys think 100 is enough?

Quote:Can we please get a roulette thing going man.

I don't think so unless the developer who created the slots and blackjack decides to make it. He is building a Wheel of Fortune script which we will probably purchase. <http://wheeloffortunescript.com/>
I don't know if it will be done in 2 weeks or 2 years though. That's on him.

100 should be fine. Anyone betting higher is going to be sore if they lose.

I'm developing a dice/10,000 game. If you'd like any assets I could hand them over for free. 3D, pure css dice, with smooth animations. 10,000 is too complicated IMO, but I'd love to see a standard dice game on here. Lemme know if you're remotely interested. ? (It's responsive too.)

That sucks man. I can always wait I guess. Hopefully soon we can see roulette.

Wheel of fortune looks pretty good though. I used to watch that when I was a kid.

Anyways, I am off to play some blackjack. :D
Started out with around 58 bytes, now I am up to 234. :D

Minnesota Nice - September 4, 2018, 11:28 pm

Do you have access to the values for payouts?

5:4 is just weird. 3:2 is pretty common and I've played at some Casinos that are 6:5 but I've never seen 5:4

1.5x is usually the standard amount to win on BJ.

Silent Uprising - September 5, 2018, 1:11 am

Someone said it above in the thread. 100 is rather low for the max bet. For us all in-ers we like to bet big. Would it be possible to have the max bet be 5k or so? 10k? BJ is my game!

Omniscient - September 5, 2018, 1:22 am

I plan on making bet max to 500. Also the Blackjack payout we'll keep for now.

I spoke with the developer about a few things including when he expect that Wheel of Fortune script to get released. Seems it's months away which means it's now off the radar for inclusion. Maybe when it's released we'll discuss it then but I believe HF will be doing other things with Bytes. For now we have Lottery, Slots, and Blackjack.

There is definitely more coming for games but not gambling. The games we'll add will be custom to HF and innovative.

Not every Blackjack game follows the same rules. This one here follows quite common Las Vegas Strip rules, where dealers must hit on a soft 17 (= Ace 6).

On a hard 17, he must stand.

Everything up to 16, hit.

Anyone have the UID link to check other users' stats?

WageWolf - October 14, 2018, 8:15 am

I keep losing, haha. Gotta love me some gambling! ;)

Hey the left side 'rules' says that blackjack pays '3:2' but then the button 'payout values' says it's a '5:4' payout. I think this needs to be fixed lol

Any Bytes Texas Holdem in the future to gamble with other players? Sorry if you are asked this frequently I don't read threads often

StoqnKolev - February 6, 2019, 8:46 am

Just lost all my bytes

Posting to comeback later and recover
