Thread: [Made \\$100,000 within 2 months](#)

Wolf?TC - September 5, 2018, 4:48 am

Made around \$500,000 from crypto alone. I made \$100,000 from only margin trading which most are short selling. I think September going to be a good month for me as i expect volatility. I am thankful for crypto for what it has gave me and i hope you crypto investors experience some gains in the future. Remember you can make money in a bear market. Don't wait for an uptrend to happen, be smart and make some money in this market. I am looking to get some other sources of income like Shopify, CPA and Real estate in the future. Any questions you have, don't be shy to DM or reply to the thread. Also going to provide proof since last time I got negative repped because i didn't show any.

Btw I will short BTC if it falls through \$6920 on the daily ?

That is impressive af! What amount did you start with?

Blade - September 5, 2018, 7:00 am

It looks like I need to look into this. How much commitment does it take to make that kind of money in the crypto market?

racigodar - September 5, 2018, 8:07 am

Do you use bitmex op? Im into shorting and longing btw.

Edit: Just read the whole thread. I might PM you I would like to learn something from you.

Frukt - September 5, 2018, 3:09 pm

Good job there! I wouldn't show the money if I were you because there are some really experienced hackers on this site and they will make you a target.

I have only been losing money on crypto the last months, you are one of few that profit good from a bear market.

I started crypto with around \$600 last year. I haven't added any extra money. ICOs ive made \$400,000 alone and never lost a trade and made money from every ICO. Average gain is around

like 300-400%. I have taken profit from every single ICO and not invested in any crypto atm.

I would say a lot aha. Everyday ill study the markets for a good 3-4 hours for almost a year. For me usually when i want to get into something i try the hardest and ill be so motivated esp when its money lol. I guess if you want to make money from crypto just learn basic TA an study the market and find out why did the market react like this and etc. Or find a good mentor and im not talking about those shitty telegram crypto groups where you pay \$100 weekly.

Yes but most of the time shorting. I just made \$4,500 from shorting at \$6,900 like i said in the thread. Hope someone listened to me..

I'm not really into the whole "crypto-speech" so please excuse my question; are those profits from short-term trading? Like buying alt-coins and selling them shortly after? I bought 10\$ BTC like a year ago and it's worth a bit more now, but I haven't really looked into short term investing in alt-coins.

I want to get into ICOS. Seems like that is the money maker.

good earnings. most i've made was 5K lol and its been down trend ever since. #HODLing

No money to bother try and trade in bear market :(

Tbh ICOs is the easiest money you can make if you know what your doing but in a bear market I am investing in like one a month. I am currently looking at an ICO called Harmony, you can check it out if you want. Each ICO I go into I am putting down like \$30-40k because I am so confident it wont go lower than initial price and it having a good chance to multiply. One major tip I can give you is, NEVER invest into a social media ICO!

\$600 to \$100,000?

Have you ever considered mentoring a couple interested members, or something of the sort? Would be an interesting thing to learn, however I would not know where to start. :/

I just don't think I will have the time. I am also trying to get into CPA and Shopify which is going to take even more of my time. You can ask questions and If I have the time I'll answer them. It was \$600 to \$500,000. Made \$350,000 from ICOs and with that money I am trading.

CPA is an awesome way to make money, and I wish you the best of luck. As a matter of a fact, my own network is going to be launching soon.

->

I know this is pretty generic, and I understand you do not have much time, but do you have any recommendations for getting started? I am interested in how you learned the skills utilized to earn those funds and was not sure if there were any good courses, articles, videos, etc? <3

No I use bitmex for margin trading. Beginners should use Derbit for their broker to trade though because there user friendly UI.

Do you know which platforms besides bitmex have shorting ability?
Also, can I short in bitmex without using margin?

I think you can short on bitmex without using margin.
Bitfinex allows margin trading too but thats fixed at around 3x or something.

How does shorting on bitmex work? If you lose your entire account balance does it close your trade or do you go negative and have a overdue balance that needs to be paid?

Also, whats the absolute minimum you'd suggest starting out margin trading and shorting?

Niko - September 9, 2018, 1:06 am

"Hookers & Cocaine"

what do you recommend as initial investment?

if i have \$1000 as initial investment, should i invest 100% of it into 1 coin based on leaked premium telegram signal groups for 3-7% of roi? (around 100\$ profit)

should i diversify initial investment into multiple coins? if so, how many? what time period to do the buy/sell?

do you do mentoring? i want to learn from people who already have what i want

RAT - September 25, 2018, 7:59 am

Nice mate, do a gif where your hf account is also seen. Would be nice :D

Going into CPA with such ROI, pointless, keep focusing on that what you're doing right now. The profits - invest them into some tangible assets - hedge your portfolio (buy some real estate, get some blue chip stocks). Money makes money, and it 's better to focus on the things you're earning well with and let the rest of the money just earn interests somewhere else passively. CPA would be the shittiest choice ever - Maybe Amazon, Shopify yea, CPA - hell nah.
