Did you create this yourself?

edit: <https://www.a1k0n.net/2011/07/20/donut-math.html>
actually really interesting stuff

actually really interesting stuff

It's based off of an old program called "donut.c". And that's the exact article I used to figure out how to recreate it. It's a very interesting read, as long as you don't mind the heavy math.

I'm not that much into math myself, but am still amazed by stuff like this.

Very interesting and unique,

However, I can't see any secret though; Well, I shouldn't see it, because it's a "secret"!!

Please show us your next project.

All the best.
