I would recommend allowing someone with HIGHER reputation in the community to have a vouch copy to verify the status / authenticity of your service.

google - September 9, 2018, 10:13 am

ALL TEST SERVERS HAS BEEN GIVEN OUT. IF YOU NEED THIS SERVICE, CONTACT ME ASAP.

NB: CONTACT ME IF YOU ARE READY TO BUY. EVERYTHING YOU NEED TO KNOW IS ON THE FIRST POST ALREADY. GET A .COM DOMAIN BEFORE YOU MAKE CONTACT. YOU CAN GET YOUR DOMAINS AT ANY REGISTRAR OF YOUR CHOICE E.G NAMECHEAP or GODADDY or BLUEHOST. THERE ARE LOTS OF REGISTRARS FOR THAT. GETTING A .COM DOMAIN ACCOUNTS FOR A LONG LASTING SMTP SERVER. IF YOU ARE LOOKING FOR ANYHOW SMTP, I AM SORRY THIS IS NOT THE THREAD FOR THAT.

I also want to ask, what software is advisable to use in powering with your smtp. Kindly get back to me asap. Also, is this inbox bound ? and not like some that goes straight to spam or never delivers.

immortal1 - October 30, 2018, 10:49 am

Don't deal with this seller.

Very unprofessional, and threatening to "report" me for mentioning that I had a dispute with him.

He advertises ::

Q: How many emails can I send in a day using your smtp

A: It has no daily limits. Send as many as your PC can contain

However, he only allows 20k emails a day to be sent.

proof:

He did refund me. But he won't update his thread saying that his smtps DO have limits.

I did edit my post saying that the dispute was resolved, and then he threatened to report me for mentioning that we had a dispute.

What a child.

Also, his smtps dont have a 10/10 on mail-tester.

They don't include rDNS update which is needed for many mail boxes.

google - October 30, 2018, 11:19 pm

@immortal1, u can also let the forum know how u want to send 100,000 emails in 1 hour with \$30. Told me that after configuring your server. Guess u have seen the cheapest service ever.. My service is lit and genuine. I GAVE YOU A REFUND even after configuring your server because I dont scam people. U can see that from my previous vouches. I already told u to take down that hate speech but u insisted on leaving it there. Its ok. I have contacted the Admin about this and I hope they respond timely. U can go spend \$1000 for 25+ smtps like u did on this thread (<https://hackforums.net/showthread.php?tid=5634749>) and u got scammed, guess thats exactly what u needed. Its okay to get bitter but not on my thread bro.

My Word: My SMTP has no daily limits

My Recommendation: For your server to last longer I recommend 20k emails for a day.

Felicity - November 1, 2018, 5:35 am

I already knew it was a shitty thread , seems i once had deal with this idiot and i ended up deleting him from my contacts list .. or he claimed to be selling 100k Swiss leads for 3000\$, this dude is from Nigeria . don't deal with him and besides it takes a major idiot to think they can send and delivery unlimited emails with \$20 , i mean sending the emails isnt the problem but not being block by the recipient server is , most providers will lock you out after 1k emails from same IP without a very very strong reputation , to send unlimited emails you need around hundreds of IP rotations from even different ranges , or you could buy an smtp scanner and get high quality smtps

google - November 1, 2018, 11:41 am

@immortal1, I deleted and shut down your server because you were so rude. I decided to give you a refund than to deal with a rude client. I went offline just for two minutes and you posted thrash on my thread. You are not more impatient than my clients but they understand that I am very busy and give me some time. I have servers to shoot 100,000 emails in 1 hour but I decided not to offer you any of my services. Scammers dont give you a refund, I DID.

@Felicity Do your research very well bro. This is my first SMTP server post in this forum. Yes, I AM A NIGERIAN and I am very proud of it ?? . Just because you are not a Nigerian does not make you all knowing. We are nice people and we know stuffs too. However you dont go around ranting like a kid when you are charged for a service, if you cant afford it, quietly leave. No one will force you into your pocket. ? You dig!!!

My servers are fully configured with Power MTA.. DMARC, DKIM and SPF records are fully configured also so they a'int shitty. If they were, I wont have those vouches and more clients too. So you take your shitty SMTP scanner (a huge frustration) and open a shitty thread lets see how far you would go. Use your head.. I no wan abuse you

It's so much better to get smtps from good range using smtp scanners.

I want to say a VERY BIG thank you to all our customers that made it worthwhile this year ? ? . We are very grateful and we appreciate you all for everything. ?

For Those Who Ask: *****

1.) We DO NOT SELL HACKED SMTP SERVERS ? . All servers are fully configured and gives 10/10 on Mailtester.

2.) We understand most people have had bad experiences with previous vendors, once you place an order, you will receive your services. Its a GUARANTEE. You can flip previous pages for vouches. You are welcome to open a contract anytime on HF, if that will make you more relaxed.

3.) Everything you need to know is on the first page. A .com domain is preferred and will be used for the SMTP config. Also just a very slight price update. *****

We also have available Email Leads, Email Senders, Cpanel Hosting, Email Extractors, Links, Scam Pages, Hacked Facebook Account etc.
