Sell what ? Please be more descriptive.

If you have some budget you can try to run ads for your content.

Fake views won't do any good run real ads for real views.
You can also try to share your video on several social media and you might get some real views.

You pay company to run ads on their platform.

Google Ads account -> Run Youtube Video ads.

Good luck with that, it's probably not worth it. I think you should overthink the general concept and business first
