Thread: [3 Q's \(Nox + Bluestacks 3N\)](#)

F11 - September 7, 2018, 9:27 pm

I have 3 questions related to Nox and Bluestacks 3N.

1. Trying to use GameGuardian lua script but it says lua extensions not supported? (Bluestacks 3N)
2. SuperSU isn't showing up in Google Play (Nox Player)
3. Is there a way to change it to Arm64? (Both)

Prodigic Son - October 16, 2018, 2:43 pm

1. That isn't a legitimate question. What is it exactly that you are asking?
2. There is no question here. You must find SuperSU on a third-party distributor site.
3. No.

3. No.

My bad. Lemme specify since you wanna be technical about the layout of my "questions."

1. When using Bluestacks 3N, I use GameGuardian to modify some of the games I play some online some offline. It uses .lua scripts to do the modifications while in the game. The problem is, it keeps telling me lua extensions aren't supported in Bluestacks. I know they are because others use it for the same exact reason. Any thoughts?

2. You answered it. I know where to get it 3rd party, but I hadn't, when making this thread, realized that it'd been removed from the Play Store altogether.

3. Yeah, I've done research since this thread creation & now realize how stupid this Q is.

Overall, thanks for the replies.
