Thread: [Fortnite Galaxy Skin \(Note 9 Skin\) + 15000 V-Bucks \(Samsung Offer\)](#)

Malevolent - September 8, 2018, 12:51 pm

Looking for offers.

The higher the offer the better, of course.

Won't be accepting \$20-70 as it's just not worth my time for that.

Looking for \$100+ as a minimum.

PLEASE NOTE THESE GO ON EBAY FOR HUNDREDS, IF NOT THOUSANDS (SOLD LISTINGS, NOT JUST COMPLETED)

I WILL NOT BE DOING THIS FOR CHEAP OTHERWISE I WILL JUST TAKE THE HEADPHONES BECAUSE IDGAF ABOUT FORTNITE

Do remember I need to "play" three rounds (IDGAF if I win or lose, so if you care about that, you're talking to the wrong person)

Can only do this with one person as I only have one Galaxy Note 9.

What I have been messaging people:

It is. I could either pick the AKG headphones or Vbucks/skin it looks like.

Looks to me like it's worth more than I thought it was though so I might not be doing this unless someone really wants it lol.

Headphones are worth like \$170 and I was planning on buying some anyways.

I guess let me know. My device is eligible since I was early enough.

I'll offer \$85 brother

we can use a MM aswell he hold funds while we wait for the skin to pop up

After doing more research I am not sure if HF is the place to sell this.

The VBucks alone are worth like \$150 (probably \$100 on here) and the skin, well, we all know how that is with this game.

If anyone has an offer I can't refuse, feel free to PM me or post here, otherwise I doubt this will sell here.

Not worth thousands but you can get a few hundred if you're lucky

Oh yeah, I don't expect to get \$1000+ but hundreds would more than satisfy me lol.

Especially since I only got the phone to have a nice phone. Just figured out about this offer today

from someone on here.

If i'm not wrong I think you can only get the galaxy skin now, unless you pre-ordered?

I pre-ordered.

I have proof of the offer. Let me upload it quick.

EDIT: <https://imgur.com/a/L8ooLuc>

If you are an actual interested buyer and are for some reason concerned about dealing with me I am more than willing to timestamp an actual picture of my phone screen with this on it.

I think you're overthinking this. No, I wouldn't say vbucks are worth that much because I've bought 13,500 vbucks here for 30\$. You can also get this skin for free if you just go into a local store and play the game on their test device. (If no one has done it already).

With that said, all the stores around me have done it already, and I'm looking for it. I'll give you 100\$ flat. Won't go first, willing to use a middleman that will release the funds once the skin is on the account.

What type of currency are you offering?

i thought that's why he said it's not best to sell here. Althought he said 100\$ here.

Better to sell here for a bit cheaper and know you'll get a safe deal then try to sell elsewhere and potentially get charged back on and lose the skin and vbucks.

selling on eBay is risky imo. They don't really protect you against digital stuff, unless something changed in 2 years. Very easy for someone to buy and just say they never got it lol.

As for value, two of my friends say they got the skin for \$100.... idk if they got the v-bucks aswell though (I assume so.)

Exactly why I am entertaining your offer ^
