Thread: [70% OFF | 8 BITCOIN SCRIPTS, MAKE HUNDREDS OF DOLLARS A DAY](#)

VodafoneNLD - September 9, 2018, 2:46 am

I'm offering to sell you a collection of 8 BTC scripts all made by myself which made me a good amount of money when I tested them.

These are not martingales, like a few select people (who didn't even buy the script) are trying to tell people like you.

The larger the bankroll, the better. At least 2k-3k bits is the recommended minimum.

You can do this on any site that supports BTC scripts (I use bustadice), and like with other scripts, it works from your phone or PC and you don't need to be 18+. No software needs to be downloaded aside from the zip file with the scripts.

Why am I selling this if it can make hundreds of dollars a day?

Gambling just isn't something I do at the moment.

Things-that-might-be-added-but-i'm-not-certain-quite-yet list:

Strategical 'recoup losses' script

Price: \$100 \$30

Flash sale! Sales are going to slowly decrease until the price reaches its initial \$100.

Money made over the testing period with an initial investment of about \$175 was about \$250.

You can buy the script from selly (dot) gg/p/58ee059b (I can't post images or links yet)

Vouches:

kushpvo on Nulled:

Quote:Bought it before 1.5 hours. Started betting before 1 hours.
Deposited \$30, tried 3 scripts in total. Ran for like an hour total - with breaks in between.

Here is the result:

\$30 USD Deposit = 4,280 bits

After 1 hour:

Profit: 1,325 bits

SEEMS AMAZING! All you gotta have is Luck + Money enough to sustain the losses. Also, DON'T BE GREEDY.

Yeah man!

I have no other interests in doing stuff here, so that's why this is my first post. Glad to see you understand :)
