Thread: [OpenSSL or Schannel for SSL](#)

Keat - September 9, 2018, 11:52 am

Trying to setup some SSL on a socket connection for a RAT. Anyone used Schannel before? Or recommend using OpenSSL? Seems like OpenSSL documentation sucks.

0xDEAD10CC - September 9, 2018, 6:24 pm

OpenSSL is the way to go in my opinion, what have you tried with these libraries so far?

PerfectStorm - September 9, 2018, 6:32 pm

Hmm I never used that feature. Which RAT are you working with?

Auriana - September 10, 2018, 3:13 am

I wouldn't use OpenSSL, it's too bulky and there are better libraries now. I use ARMBedTLS.

3DES - September 10, 2018, 6:53 am

Coding a rat with openssl is way, way too bulky. Use winapi, no need for external libs.

Any good documentation on it or examples?

Any good examples? I tried to find SChannel examples and its terrible. I am still elarning.

Auriana - September 11, 2018, 6:28 pm

Yes check out these to websites.

tls.mbed.org/api/index.html

tls.mbed.org/kb

Search winapi wininet http request, still not sure why we need external libs for malware

HiddenEyE - September 12, 2018, 8:39 am

(Sep 11, 2018 10:01 PM)3DES Wrote: [\[CITE\]](#) Search winapi wininet http request, still not sure why we need external libs for malware actually we do in some situations. especially when you are not rooted in a particular aspect of programming.

am not a fan of external libraries most my code is not based on it, but i got stuck when i was coding a licensing system so opted in for external library. thats it.

i would recommend openssl
