Thread: [Scammed by YourLocalGoldFarmer UID=3957963 for \\$49](#)

Contract: <https://hackforums.net/contracts.php?action=view&cid=8726>

Thread: <https://hackforums.net/showthread.php?tid=5791338>

User wanted to sell me a \$70 AGC code for 70% BTC. Went ahead and took the leap of faith to establish a buyer-seller relationship by sending the \$49 first. User has not sent me the code and continues to aimlessly wander around HF.

I think the fact that the seller continues to avoid this post is a tribute to his scam. I will provide screenshots upon a staff member's request.

Scammer 2.0Yeah. I saw that one but assumed nothing of it since there was a lock. I guess it was because the contract was not accepted by both parties d'oh.

Yea don't worry about if threads are locked. If it's resolved the 1st post will usually state it

Update. User gave me a negative rating saying that he sent the code on Discord. Never once in my life have I mentioned Discord on this forum. Smh

GoldFarmer is a scammer, he attempted to scam 50\$ out of me for a Halo Account that I was looking for but failed since I used Minimalist as a MM even though he agreed to use Minimalist as a MM, not sure what he was going for there lol. He just added me to his ignore list and just kept browsing the forums like nothing. How is he not closed tbh.
