Thread: [No ones noticed this.](#)

**Nadisty** - September 10, 2018, 4:04 am

I like the fact we can see popularity along with B rating in the marketplace. It might confuse some new members though if they don't read the rules and mistake it for marketplace rep. When did this get added?

**pmtobefriend** - September 10, 2018, 4:07 am

I don't understand your point at all. What will confuse the new members? If they're on the marketplace, there's the marketplace reputation (will show up) that you just named as 'B rating'.

**Nadisty** - September 10, 2018, 4:19 am

I didn't just name anything, Omni named it that... If they don't read the rules they're not going to know are they.

okay so you are suggesting to have something on rules about it? get that stuff in the suggestion section nah?

**Ømen Xiii** - September 10, 2018, 4:27 am

I think that may be why they changed it from "rep" to popularity. I'm not sure tho but I see how it could get a little confusing.

**mehranux** - September 10, 2018, 4:36 am

Yeah it made me confuse when I joined

**Abrxpt** - September 10, 2018, 4:40 am

People shouldn't get scammed regardless man, it's unfair for people to do that to another individual. Whatever we can get that improves the marketplace is a good direction to move in.

? You should read rules first in RANF section

When you visit market place you will not find popularity of member and is replaced with B rating which is a separate entity independent of Popularity/rep

When you come out of Market place you can see popularity/rep and not B rating

your popularity = 134

your B rating = 0

I think its the reason for changing it to "popularity" is so it's not going to be mixed up with trust at all. Nobody will trust somebody just because they are "popular".

Or are people that stupid? You know what nevermind people will still think it's trust, but it's a good effort.

**Xerotic** - September 10, 2018, 2:48 pm

Postbit will only display both (Popularity and B-Rating) if the thread is stickied. Otherwise Marketplace threads will only show the B-Rating.

Account Age + Trust Scan + on site purchases like upgrades/awards. Reputation before didn't earn my trust, b-rating just makes it easier to spot disputes.

If they don't read the rules then it isn't Omni's problem

I for one used reputation as a factor of trust because if I'd look through reputation and most of them were about doing a successful deal then I would consider that member trustworthy at least to an extent, I don't trust anyone on here that much.

Of course things like Trust scan have to factor into that as well. Upgrades sure but it's not hard for someone to buy a stolen HF account and scam on it. People do it all the time or at least used to so I would say awards have never been a factor to me really.

Account age also yeah to an extent, I used to write in my exchange threads that I don't go first on deals with current year registered members, it was more because I knew anyone can make a multi and scam on it.

I think everyone can agree that B-rating is doing a great job of preventing scams. Nobody likes change though, it certainly took me a little bit of time to get used to it but now I do a contract with every deal and it helps me build my actual reputation on the site. Not talking about pixels.

Reputation helped every now and then, but barley. I constantly saw scammers who scammed multiple people with 0 neg rep

I recall seeing members with over 2,000 reputation before and literally a page full of scam reports.

It pissed me off so much.

Ah, TS is an upgraded feature. Didn't even cross my mind. B-rating will help those who don't have access to it.

You can see both in MP.

**LonerStoner** - September 10, 2018, 3:51 pm

I don't understand any of this should I just upgrade

**Blazin** - September 10, 2018, 3:52 pm

Reputation means nothing now. And it's been changed to canned replies. The move for this was to destroy reputation abuse.

The marketplace reputation is now what trust is sort of like a ebay track record.

**LonerStoner** - September 10, 2018, 3:52 pm

One page says reputation then another says popularity then another says B rating.... I'm so lost

**Blazin** - September 10, 2018, 3:54 pm

(Sep 10, 2018 03:52 PM)LonerStoner Wrote: [\[CITE\]](#) One page says reputation then another says popularity then another says B rating.... I'm so lost

Don't worry about reputation. Focus on the B ratings in market profiles.

Well yeah that does happen, but often they end up with no negs as well

**Omniscient** - September 10, 2018, 10:39 pm

So annoyed that people are dumb about changes which I know make sense. We continue trying to improve based on feedback but at some point I can't make the site function for members with a low iq.

**?lack Hat™** - September 11, 2018, 10:27 am

I wouldn't mind the pop and rep be next to each other in either forum. Although the guy maybe legit he maybe an asshole lol.
