The time start counting on the first time you use the code, even if you are not playing.

This may just be the best PUBG hack that I've seen around hack forums. With that being said I do know where you can get the best CSGO hack and that's Legacy Aaim and 25% off with promo code 25WZRD which is a limited time deal with now. You could crush csgo and pubg with both this cheat and legacy aim. Great work OP.
