Thread: [Trust Factor "should" include amount of bans excluding vaction](#)

Terry A. Davis - September 11, 2018, 4:02 am

Well, what it says on the tin.

I think Trust Factor scans should show the amount of Bans a user has had minus any vacation bans (Duh?).

It is useless and a waste of time but I think it should still happen.

Hell, even just count Market Place violation related bans or something similar.

What is the worst that could happen? You need to add a new column to the database and then increment it when someone is banned? "ezpz"

The former part of this sentence sums up my thoughts on this suggestion.

Elitas - September 11, 2018, 9:01 am

Maybe a 'Marketplace Violations' counter, which shows how many marketplace-related offences they have committed.

If it useless and wasteful then why add it? Awful suggestion

int - September 12, 2018, 5:59 pm

I still feel like every ranked person should have access to trust factor

Pointless I get banned for numerous reasons never once has it been from how I conduct business, or reflect on my integrity.

SO why include something that could affect me as a retailer when I get mouthy in the lounge??? ?

And with that I will close this thread.

Bans do not determine how trustworthy someone is. Most bans aren't even marketplace related and even if they are, it does not tell you if that person is trustworthy or not.

Like you said, this suggestion is useless and a waste of time.
