Thread: [emo rap as the next wave, my newest song](#)

Sonata - September 12, 2018, 5:15 am

Hey guys, judging from how juice wrld is so big, how big X was, how lil peep climbed to 4mil monthly when he passed, I feel like the next wave of pop could likely be emo rap

let me know what you guys think!!

ALSO:

I just dropped a song and its fucking sick!

Will definitely check it out later.

Hexiah - September 12, 2018, 5:32 am

You should consider applying for the Sui Generis group.

Traum - September 12, 2018, 5:53 am

Can't listen to it right now but you should probably post that in the music sub subforum aswell.

Mr. Robot - September 12, 2018, 7:38 am

That was pretty sick dude, glad I took a chance. Friend wants to use it as a chorus for his rap

Traum - September 12, 2018, 7:42 am

Just listened to it and I really like it! Keep it up bro!

Death - September 12, 2018, 7:43 am

The song is lit, but in my honest opinion you should work a little on the quality. Its a little bit noisy you can make it better if you work on it more.

DopplerAF - September 12, 2018, 9:40 am

Just listened to it, it is dope as fuck.

Keep making more tbh.

Haha cool thanks, unfortunately, the chorus was by the artist vaboh and he/his label would really be mad if anyone used it, and since its my song, same with me.

its not terrible. i can feel the vibe n understand the lyrics which is a good thing.

it was a bit too slow though for my liking. all my opinion though, its good work that you put together .
keep it up.

It's been the wave on soundcloud for years.

Used to be homies with a bunch of dudes in that scene but got bored of it.

Pulls plays tho I think one of the tracks I produced got 50k and the other is like 25k

It's pretty fucking lame now though. Everyone jumped onto it and now it's just style biting everywhere so I dipped the scene

I probably shouldn't have because after I dipped they all got big and now they gone hollywood on me lmao

Made this track with yesterday when he had bout 300 followers and now he's out here getting shout outs from nothing,nowhere n shit

Constructive criticism:

Clicked on your track and expected some mediocre shit because let's be real, most of soundcloud is. I was pretty impressed. The hook was crafted well and is catchy. I specifically like the "You're poison... You're poison...". I found the verse to be kind of cliché. Didn't sound bad, however it's basic lines we've heard before in sad rap. The production is solid and compliments the vocals.

Yeah the other track I produced in that genre is this

<https://soundcloud.com/sailormoonlet/soulfire>

And it depends on the collab. I'm not really into that kind of stuff anymore but if you use ableton send something my way and I'll have a look.

Can't listen to your track right now but will do later.

I've been listening to emo rap for a long time. Love lil peep, bones, oregontrail, yung lean, brennan savage and \$uicideboy\$ if you can count some of them as emo rap. It's definitely the next wave and I can see some of these artists go very mainstream.
