Thread: [Read Carefully | Unique Shopify Product | \\$\\$](#)

Please read carefully before pm'ing me!

Hello friends, I'm a fellow shopify nerd/geek sort of when it comes to online gigs and making money i've always been about it.

I'm 20 years old looking for someone that has experience and connects possibly, but not only in the shopify world.. Outside of it aswell.

I have a very unique unsaturated market as far as for the product goes. It's something very very unique and will sell! I've read and looked into the market behind it and it's huge, ages 16-30 for this product. I'm talking to people that know and have experience here and want to take this to the next level. The product has been sold only on eBay and hasn't been brought to the USA yet which makes it PERFECT! It's nothing from walmart, target, etc. Something amazing!

Please, if any of you have real experience and have connections. I'm down to meet in person, etc.

I'm to the point basically where i'm looking for someone that can help me/us get the product possibly by creating it ourself? or offering the people whom create this in CHINA a good deal. Cash talk.s.

Please feel free to shoot me a high quality DM! Thx
