This cheat was never detected since I started developing it in April, and has all the features you need to win a match without being blatant.

We have limited slots per month, so it will be harder to be detected by other anti-cheats.

The triggerbot is really op and works like a charm ?

laser - September 14, 2018, 7:37 am

it'd be incredibly hard to make a cheat like this NOT be undetected Imfao you can literally find this kind of cheat anywhere for free.

being undetected for a few months is nothing special and making something like this only requires basic pasting from other inferior programming forums.

This isn't a paste unlike [your cheat](#)...

Free cheats are the easiest to be detected and I can't find any that includes radar hack and no

flash.

I'll be real with you chief, this isnt special

Ok, so you shouldn't be worried about this thread making rivalry to your "best private csgo cheat".

99% of free cheats that aren't meant for hvh include those features, and the only feature hvh cheats don't have most of the time is "radar hack" which can easily be added by changing the netvar m_bSpotted to true.

How long does free cheats stay undetected?

Why wouldn't I use m_bSpotted?

Public cheats stay undetected for about a week. That doesn't mean you can't do some very simple modifications to make it undetected.

Also, the reason I pointed out the netvar and how it's used for radar hacks is because you brought up "radar hacks" as if it's some mega uber leet hacker feature never before seen... but it's not.

laser - September 14, 2018, 6:54 pm

my post is over a year old when i just joined the csgo cheating community, but you're selling features that are all findable on public forums with public code in late 2018. a little bit of basic understanding of c++ and you can make it undetected for free.

HackerLord - September 14, 2018, 10:54 pm

This doesn't even have a aim bot. There are cheats with more features and lower price then this.

I won +25 matches in a row in global non prime with so many HvH and didn't need aimbot to win

It has aimbot now btw

fawssy - October 9, 2018, 11:32 am

Vouching for this cheat, All of the features run extremely smooth and the cheat itself is great.

If you're looking for a legit, undetected and simple cheat, go with this one as it is very affordable with amazing features for its price.

PunchMan - October 11, 2018, 4:05 am

Vouch !

I use this cheat everyday for now a week.

It's very and easy to custom the "config".

The aimbot customization is easy to make it legit.

The wall is good, bhop too. Radar hack works well too.

Very nice cheat for that price, i will expand my membership ofc ^^

Recloc - October 11, 2018, 4:29 am

Keep the good work up. Vouch for this guy!

smartwhip - October 19, 2018, 7:14 am

Vouch for this cheat, been using it for the past week frequently and can positively say it works well and have enjoyed using this in comparison to other cheats I have tested in the past.

Good job, keep up the good work.
