Not sure of the method used here but OP says it isn't illegal carding. Please note these are your not your personal codes as they seem to be like unactivated codes from other people as it comes with a random email + key per software. Not sure if blackhat or what but it works, either way. Vouch. ?

Hello,

I purchased TunesGo for Mac from the selly link (selly.gg/p/381e94a8), it didn't state if it's for iOS or Android devices, I did receive the logins but I realised it's only for iOS, I needed it for android.
