Thread: [VB.NET ,Textbox MultiLine Problem ..!](#)

i_am_Beginner - September 17, 2018, 2:26 am

Hello Guys

i Have a Problem in VB.NET With EtherealTheme ,

i cannot add a multiline in textbox ,multiline function = false and locked cannot change to true
how to fix please help me ,....

EtherealTheme ...

```
Public Overridable Shadows ReadOnly Property Multiline() As Boolean
```

```
Get
```

```
Return False
```

```
End Get
```

```
End Property
```

My Bro ...How can i Edit this code unlock multiline change to true

SaketSaket - September 17, 2018, 6:22 am

check if you have something like this as property of that control..

```
Code Private _multiLine As Boolean = False
```

```
Public Shadows Property MultiLine() As Boolean
```

```
Get
```

```
Return _multiLine
```

```
End Get
```

```
Set(ByVal value As Boolean)
```

```
_multiLine = value
```

```
_tb.Multiline = value
```

```
OnResize(EventArgs.Empty)
```

```
Invalidate()
```

```
End Set
```

```
End Property
```

you need something like this in paint event...

```
Code Protected Overrides Sub OnResize(e As EventArgs)
```

```
MyBase.OnResize(e)
```

```
If Not MultiLine Then
```

```
Dim tbheight As Integer = _tb.Height
```

```
_tb.Location = New Point(10, CType((((Height / 2) - (tbheight / 2) - 1), Integer))
```

```
_tb.Size = New Size(Width - 20, tbheight)
```

```
Else
```

```
_tb.Location = New Point(10, 10)
```

```
        _tb.Size = New Size(Width - 20, Height - 20)
    End If
End Sub
Regards
Saket
```

Edit : I just added these lines from my one theme...
