Hi hackforums!

This release is related to my first free give-away but i feel like it should be posted here because it's a very profitable business.

I'm giving away a method to get free balance/funds on your Adwords account, with this method you can create multiple Adwords accounts, put \$350-\$750 funds on them for free, no investments required with my method.

And then sell the adwords accounts for \$50-\$150 each, you will make fast sales.

If you want the Adwords method to start making money by selling them then you can post below or skype me.

I do appreciate thanks/reputation/karma alot.

My skype is: live:kevinoosterhout88

THE METHOD:

Code Credits of this method go to RoyalProfits.club

1. You make an Dutch (The Netherlands / Holland) adwords account.

2. Put language on english or whatever you want

3. Fill in (your) identity information.

4. Choose IBAN Payment/Bank Payment/Automatic payments

You can purchase an Unlimited IBAN VBA's for free METHOD from the RoyalProfits.club shop.

6. Add the correct IBAN account from the method - we recommend those from our shop due to that they have been tested with google and succesfully accepted 10/10 times.

7. Wait for Google to send you \$0.05 - \$1.00 to the VBA through IBAN.

8. Fill in the amount that google sended to your VBA within Adwords.

9. Add balance with IBAN payment (Click "Make Payment" on the financial page) which then will go on the automatic payment system which is conducted after 31 days which means you can use the balance for 31 days.

10. setup your campaign you are done ^^

TIPS: ProtonVPN offers a free VPN trial, perfect for this job.

After the trial is done simply create a new account, no creditcard or micro payment required.
