Thread: [PUBG Internal Cheat | sentient.sh Premium Cheat Provider](#)

? sentient ? - September 18, 2018, 10:37 pm

Sentient PUBG Cheat is an internal cheat for PlayerUnknown's Battlegrounds. It offer excellent performance to the user and a very easy to use and pleasant experience. It is tailored for legit cheating and is currently in development. It's the result of many months of work around BattlEye, EasyAntiCheat and PUBG. Only that allows us to offer such a stable product, so stable that we can guarantee no downtime in 95%+ of patches. Carefully crafted after reverse engineering the way those anticheats work to hide our traces in the PC.

Pretty barebones for now but has got some good customization features. Once we release aimbot we want to do it properly unlike your regular aimbot with bad prediction over a bad distance that you see around. Features will come free of charge to subscribers as they're added.

Vouch Copies / Trials

As we're launching we'll be giving out a few vouch copies to trusted members on HF. We may be handling some 24-48 hour trials for people interested into buying that want to check out the product first. We can talk over PM.

Screenshots

Features

[Players]

- Draw Players
- Draw Skeletons
- Draw Boxes

Pricing

Monthly -> 180\$

24 Hour -> 8\$

Free 2 hour trials for those who are interested in trying our product.

Crypto Only (we accept BTC, ETH, LTC, DASH)

Instant Setup - Shortly after you pay and your transaction is confirmed everything will be setup for you automatically, you just download the loader and it's plug&play

Recommended

- USB flash drive

We recommend you to have a USB flash drive to load our cheat from to hide our cheat traces.

- Windows 7 SP1 up to Windows 10 Supported

We support all modern operative systems. Windows 7 SP1, Windows 8, Windows 8.1, Windows 10, no problem. Our product is compatible with every CPU.

- Admin account

To ensure our loader can run you must run it as administrator.

Major Update:

- Cheat rework to strengthen security. Covered some possible detection vectors, further details bellow.
- Cheat uses no external dependencies anymore (it's way smaller and faster to compile too).
- Cheat doesn't use DX11 anymore. This may change sometime in the future if we develop a very good renderer, for now this is an option that allows us to focus on more important core stuff.
- Slight menu redesign.

We have lowered the prices for monthly and weekly subscriptions. We also introduced a 48 Hour subscription for those of you who want to try our product a bit longer. We are still not sure if this will be sold for much time, we'll still have to decide.

On top of the price drop, I am still doing some price off for the first buyers on HF. Here's how it goes:

Monthly 150\$ -> 120\$ - Just 100\$ on the first 5 HF sales.
 Weekly 50\$ -> 40\$ - Just 30\$ on the first 5 HF sales.
 48 Hour 15\$ - Just 12\$ on the first 5 HF sales

You can contact me through PMs to get this special price since I can't automate that offer.

Supak - September 22, 2018, 7:21 am

Im interested in a vouch copy.

 Sent you a PM about this.

? sentient ? - October 17, 2018, 11:31 am

This cheat is up to date, with even stronger security. Has many features now. Aimbot too. Will post detailed updates soon.

New pricing:

180\$ a month
 8\$ a day (temporary deal)

Giving 30 minute trials for those who want to try before buying.

does this work for xbox

NotAFed - October 19, 2018, 5:27 pm

8 dollars a day you say? I might have to pick this up. Work on AMD processors too?

sergio_nunes - October 20, 2018, 5:05 am

180usd for a cheat its to much. If drops to 50uad month i will buy it.

Yep. Works on any CPU.

KnownLab - October 22, 2018, 4:47 pm

Looks pretty nice, however from the promotional content I would recommend getting rid of the l33t speak if you want to drive a professional product, will monitor detection status and may have a long time customer at a later date.

ssmoke96 - November 12, 2018, 3:49 pm

Would really like to buy your cheat! But could I have a trail first to test it?

? sentient ? - December 7, 2018, 8:29 pm

Hey guys.

We're back, stronger than ever. We got a new face, plenty of new features and options, improved compatibility and stability.

Looking for testers.

WinA - December 11, 2018, 8:52 pm

Gonna assume not stream proof? Also wouldn't mind a trial if possible shopping around for a new cheat as old provider is being broken lately

WISE guys - December 14, 2018, 11:51 pm

Interested in a new cheat provider as my coder is slow, looking for something more private if you are interested in letting me try your cheat let me know.

? sentient ? - January 23, 2021, 11:26 am

Thread was reopened just to add a statement:

We're not selling on any public forums any kind of product.

Many scammers are impersonating us, like one guy called "joenei1989". Do not buy anything off them, you will get scammed.

This is not our responsibility.
