Alpha Private Crypters

After requests from many customers, AlphaProducts is now selling Private Crypters. They are coded from scratch, and sold to only ONE customer.

Buying a private crypter, you can be sure that your file will not get unFUD because of other users. You will be the only responsible of your FUD time. Each crypter comes with a self ReFUD guide, to help you to keep fud as long as possible. I'm selling refud (stub recode from scratch) for \$20.

Alpha Private 02 - \$50

This crypter is coded in C# and is using .NET reflection. The interface is a command prompt, simple and easy to use. It is compatible with .NET programs only.

Multiple startup option :

- Registry Run (drop your file to %appdata% and add registry key to autorun it)
- Startup dir (drop your file into the startup dir to let windows auto start it at each user logon)
- Shell call (add a to startup cmd.exe command that will call your exe dropped at each startup)

Methods used in this crypter has never been used in a public Alpha stub.

100% FUD Guarantee

When you will get the stub, it will be FUD 0/23. If it is not, you will get a full refund.
