I have been reading through this for a while now and i have to say im really impressed.

There is ALOT of useful information in here as well as spreading methods i personally haven't seen before and there are some seriously helpful resources included.

It covers all the a newbie needs to know and comes with the necessary files to get them started.

Really detailed with pictures and step by step instructions as well as explanations for a basic understanding of how everything works.

It might take you hours, days, weeks or months to get your hands on some of this software without getting infected

In my opinion it is a great product.

Later on i will post my spreading results.
