Anyone buy into this yet? I think the future of crypto gaming can be pretty cool. Imagine if in Runescape all that RS Gold was instantly convertible to BTC on exchanges.

Honestly seems pretty solid, especially being backed by ENJ. I had a lot of ENJ from their ICO, sold at .54 then bought back in at .03.

Gonna investigate this one further. Just afraid they will have a poor marketing plan.

Looks interesting, I am sure if it has good graphics and easy to use, people will use it.
