Thread: [Missing \[R00T\] in thread prefix options](#)

flavoral - September 20, 2018, 9:51 am

Hey, this is just some minor missed update i wanted to bump up if it was forgotten.

When you open a thread in [Free services and giveaways](#) section for example, it still doesn't have a R00T option when adding a prefix to the thread title/subject ?

Sigma - September 20, 2018, 2:34 pm

Yeah, I noticed that as well, I assumed they will eventually get to it. The Admins are working on multiple different projects.

Yeah i'm aware that the admins are focusing on larger and bigger issues and projects right now. I just thought of reminding about this minor issue as it might be forgotten in the long run.

But I appreciate you because even though you are uber and you are supporting r00t

Omniscient - September 21, 2018, 7:19 pm

I know, I have to consider new display options since [l33t/ub3r/r00t] is rather long.
